Kevin Panchani

London, UK | +44 7438 492048 | kevinpanchani04@gmail.com
Portfolio: kevinpanchani.vercel.app | linkedin.com/in/kevin-panchani | github.com/kevinpanchani24

Professional Summary

Software Engineer with an **MSc in Computer Science** and hands-on experience building secure, scalable full-stack applications with **Node.js, Express.js, React.js and MongoDB**. Skilled in **RESTful API** design, **JWT authentication**, **RBAC**, SQL and NoSQL databases and AST-based static analysis, with working knowledge of **Docker, Kubernetes, Azure and CI/CD**. Comfortable in Agile teams using Git-based workflows and code reviews.

Technical Skills

Programming Languages: JavaScript, Python, Java, C/C++
Backend Technologies: Node.js, Express.js, REST APIs, Microservices, JWT Authentication, RBAC, Middleware
Frontend Technologies: React.js, Vite, Tailwind CSS, Recharts, Responsive Design
Database Management: MongoDB, MySQL, PostgreSQL, JDBC, Database Optimisation
Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD
Software Development: Agile SDLC, Testing, Debugging, Git/GitHub, Postman, Deployment, Documentation

Experience

Desk Code Solution Nov 2024 – Aug 2025
Software Engineer Intern – Node.js, Express.js, React.js, MongoDB *India*

- Built and maintained full-stack **MERN** applications across multiple client modules, delivering **RESTful APIs** for authentication, data management and business logic.
- Engineered responsive, reusable **React.js** components, reducing reported UI defects by **25–30%**.
- Secured endpoints with **JWT authentication**, **role-based access control (RBAC)** and validated CRUD operations.
- Optimized backend performance and API reliability, improving response consistency by **25%**.
- Worked in an **Agile** team with peer code reviews and Git workflows, fixing defects across development and production.

CVM University & Vadodara Police Hackathons Mar 2023 – Aug 2023
Team Lead – MERN Stack *Gujarat, India*

- Led a team to build **2 MERN prototypes** – a smart car parking system and a criminal detection system – under hackathon deadlines.
- Drove system design and presented solutions to mentors, police officials and judges, receiving positive evaluations.

Projects

React Technical Debt Analyzer (MSc Dissertation) | *Node.js, React, MongoDB, Babel AST* GitHub

- Built a full-stack tool that detects and scores technical debt in React/JavaScript repositories using **Babel AST** static analysis.
- Designed a **React + Recharts** dashboard with historical scan comparison stored in **MongoDB Atlas** to priorities refactoring.

Find My Face | *React, Node.js, Express.js, MongoDB Atlas, Face Recognition* GitHub

- Built an MVP where event guests upload a selfie and receive only their photos, using **face recognition** across photographer galleries.

Centralized Bug Reporting Platform | *React, Node.js, Express.js, MongoDB, JWT* GitHub

- Built a bug bounty platform with **3-role RBAC** (user, company, admin), reward workflow and an admin analytics dashboard, secured with **JWT** and validation middleware.

Education

Middlesex University, London, UK Sep 2025 – Sep 2026
MSc Computer Science – Dissertation recognised as best project

CVM University, Gujarat, India Jun 2021 – Mar 2025
B.Tech in Information Technology

Certifications

Microsoft Power Apps | IoT Certification | Vadodara Police Hackathon | CVM University Hackathon
